

SOLUZIONI ANTISPORCO

TECHNICAL MATS STARGATE^R

Technical entrance mat with aluminium closed modular frame, with high tech and high quality covering materials that can be combined as type as color, to get the best architectural integration without compromises about cleaning efficiency. Appliance fields: shops, malls, hotels, all kind of communities, offices, industries and home.

Highlights

- **EFFECTIVE** against any kind of dirty thanks to specific covering materials, to be combined among them
- **HYGIENIC**, not allowing dirt accumulation below thanks to closed frame. To be cleaned with standard tools, without any need to lift the mat.
- **STRONG**, extremely steady thanks to hinged elements frame. Heavy version 20 mm thick can support car passage, as for concentrated weights on small wheels of shopping trolleys or retails deliveries
- **DURABLE**, thanks to high features materials
- **SAFE** for any type of crossing, spike heel, walking stick, baby carriage or wheelchair
- **SILENCED AND SHOCK ABSORBING** (20 mm thick version) with double rubber profile below

thickness

- 10 mm for light and medium appliances, as offices, shops and home
- 20 mm heavy duty for high pedestrian passage, shopping trolleys, or strong dirt cleaning (mud, sand, snow)

Size

- Custom size produced, squared or according to drawing
 - Standard width up to 6.5 m without joints
 - No limits length

Coverings

- Coarse grain moquette, elegant, cleaning and drying, 7 colors
- Natural fibers moquette, protecting the most delicate internal floors, 3 colors
- High flexibility brush against sand, mud, snow
- Thousand grooves rubber, antislippery
- Thousand grooves aluminium, antislippery
 - NB : all coverings can be combined among them

SOLUZIONI ANTISPORCO

Accessories

- Frame for recessed appliances – opz : stainless steel
- Ramps for appliances over the floor, custom execution

Materials

- General structure
 - Modular elements, frame, ramps: extruded natural aluminium
 - Rubber common parts: EPDM
- Coverings
 - Coarse grain moquette: high deniers polypropylene
 - Natural fibers: mainly cotton, wool
 - Thousand grooves: EPDM, natural aluminium
 - Brush: nylon

Options

- Shape according to customer drawing
- Custom look with logo or brand
- Dropping tank
- Floating floor execution

Maintenance

- Stargate mats do not need to be hung-up for cleaning (closed frame, no dirt below)
- All coverings, coarse grain included, can be cleaned by industrial floor washing machines leaving the mat inside its recess.
- Pressure hydro-washing can be used with rubber, alu and brush coverings; coarse grain only as an exception, leaving mat drop-down standing with vertical bars
- Coarse grain can be managed with all synthetic moquette cleaning products

Delivery conditions

- Mats are normally delivered rolled-up and packed
- Four ramps or side ramp mats are delivered with side ramps disassembled and packed inside the roll: reassembling to front ramps by brackets and screwdriver or socket key (brackets and socket key included)
- Frame, if requested, is delivered disassembled and packed inside the roll, to be reassembled by brackets and screwdriver or socket key (brackets and socket key included); can be immediately walled on the floor, thanks to double profile below.
